How To Restore and Configure HSVE Cloud-Init Template

This guide outlines how to restore and configure the cloud-init compatible templates by using the HSVE Templates script.

Currently there are 2 Cloud-Init compatible templates:

- HSVE Ubuntu 25.10
- HSVE Debian 13.7

Step 1: Restoring A Cloud-Init Template

The first step is to restore a cloud-init template. This can be done very simply running step 8 in the HSVE Templates Script

```
==== HSVE Proxmox Template Installer (Secure) ====
Session: 4594d574-00cc-490c-a61a-7f1d358907a8
Expires: May 7, 2027
=====
1. Configure CPU for GPU Passthrough
2. Configure GPU for Passthrough
3. Download macOS Template
4. Download Other Templates (Windows, DSM, Android)
5. Download Windows Tiny Templates
6. Download Linux Templates
7. Prep for WiFi/BT Passthrough
8. Restore Downloaded Template
9. Change Download Location
10. Exit
=====
Enter your choice (1-10): █
```

You will then get an option to set where you'd like the VM Storage to be located, whether it's on your local drive on Proxmox or if you have a SAN/NFS share. If you don't have anything complex set up, just select the default which is local-lvm.

```
Available storage locations on Proxmox:
local
vm-backups
vm-san
vm-templates
=====
Enter the name of the storage location to restore to: █
```

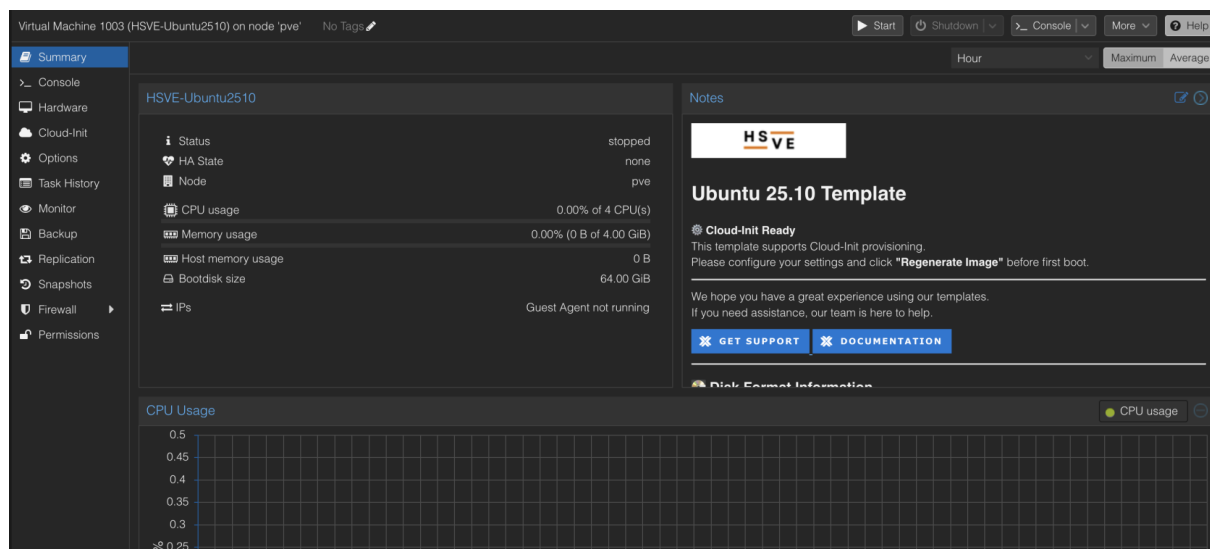

You will then get a list of templates that you have downloaded. Type in the number associated and press enter.

```
=====
Enter the name of the storage location to restore to: vm-san
Available templates in /mnt/pve/vm-templates/dump:
1. vzdump-qemu-hsvebigsur.vma.zst
2. vzdump-qemu-hsvecatalina.vma.zst
3. vzdump-qemu-hsvehighsierra.vma.zst
4. vzdump-qemu-hsvesonoma.vma.zst
5. vzdump-qemu-hsvetahoe.vma.zst
6. vzdump-qemu-hsveventura.vma.zst
7. vzdump-qemu-2004-2026_05_13-16_13_51.vma.zst
8. vzdump-qemu-2006-2026_05_13-16_29_08.vma.zst
9. vzdump-qemu-2005-2026_05_13-16_41_56.vma.zst
10. vzdump-qemu-2004-2026_05_13-18_43_18.vma.zst
11. vzdump-qemu-2004-2026_05_13-19_41_20.vma.zst
12. vzdump-qemu-2004-2026_05_13-20_04_29.vma.zst
13. vzdump-qemu-2004-2026_05_13-20_12_09.vma.zst
14. vzdump-qemu-2004-2026_05_13-20_50_08.vma.zst
15. vzdump-qemu-2004-2026_05_13-22_48_30.vma.zst
16. vzdump-qemu-2004-2026_05_14-10_03_15.vma.zst
17. vzdump-qemu-2004-2026_05_14-10_16_26.vma.zst
18. vzdump-qemu-2004-2026_05_14-11_23_41.vma.zst
19. vzdump-qemu-2004-2026_05_14-12_38_42.vma.zst
20. vzdump-qemu-2004-2026_05_14-13_21_06.vma.zst
21. vzdump-qemu-2006-2026_05_14-16_48_46.vma.zst
22. vzdump-qemu-2005-2026_05_14-20_15_26.vma.zst
Select the template to restore by entering the number (1-22): █
```

You will then get the progress like shown below:

```
18. vzdump-gemu-2004-2026_05_14-11_23_41.vma.zst
19. vzdump-gemu-2004-2026_05_14-12_38_42.vma.zst
20. vzdump-gemu-2004-2026_05_14-13_21_06.vma.zst
21. vzdump-gemu-2006-2026_05_14-16_48_46.vma.zst
22. vzdump-gemu-2005-2026_05_14-20_15_26.vma.zst
Select the template to restore by entering the number (1-22): 8
restore vma archive: zstd -q -d -c /mnt/pve/vm-templates/dump/vzdump-gemu-
/vzdumtmp2728382.fifo - /var/tmp/vzdumtmp2728382

```

Once the template is restored select it from the proxmox side menu, and you should see the following screen:

Select Cloud-Init from the left and side menu to get started!

Here you will input the following information, User, Password and IP Config.

Once you have set the information, **you need to make sure to select 'Regenerate Image' otherwise the VM will not set up correctly.**

Once you've pressed 'Regenerate Image' You may boot the VM. and you'll be able to log in with the username and password you have set. As well as this if you've set static IP details too, you'll be able to SSH in!

If you have any further questions please do not hesitate to [contact us](#).
